50 STEEL (185)

OVERVIEW.

The 50Steel is a superyacht from Italian builder Sanlorenzo. The yacht's exterior has been designed by Zuccon International Project and Piero Lissoni was responsible for the interior concept.

The contemporary mantra of maximizing the indoor-outdoor connection is fully realized on the 50 Steel. Large openings, modular spaces, and movable panels allow guests to feel completely immersed in the surrounding environment.

The 50Steel will harness a methanol fuel cell system which will allow the vessel to generate electricity for on-board hotel services, with engines and generators switched off which will improve the yacht's eco-footprint while at anchor by around 90 per cent.

50Steel embodies Sanlorenzo's hallmark refinement and innovation, presenting a perfectly balanced profile with an undeniable elegance on the water.
