ACALI

OVERVIEW.

ACALI is a 2024 WiderCat 92. At just under 40 feet wide, she's the widest yacht Wider Yachts has ever built, and every inch of her 28-meter frame is designed to impress. As the first multihull vessel from the Italian shipyard, ACALI combines cutting-edge technology, sleek design and expert craftsmanship to create a truly extraordinary yacht.

Her Luca Dini exterior features bold, wide steps with chunky treads, making it easy to move between decks.

ACALI offers accommodation for up to eight guests across four beautifully appointed cabins, with two stunning VIP suites at the aft of each hull. These cabins are spectacular—each with its own drop-down balcony that transforms into a waterside terrace, giving guests direct access to the beach club

The main salon is spacious and modern, with edgy touches that showcase Wider's commitment to innovative aesthetics. Upstairs, the upper salon offers a more intimate spot to relax, whether you're enjoying a nightcap or catching up on a favorite show. And don't miss the expansive bridge deck aft, with its massive bar and plenty of seating—perfect for entertaining.

ACALI continues to impress on her exterior decks. The foredeck sunpad is an ideal spot for soaking up the sun, while the 67-square-meter beach club is a water lover's paradise. With fold-down bulwarks and space for water toys—including a 4.5-meter tender and a Jet Ski—this is where you'll want to spend most of your time. The transom hatch even transforms the tender garage into an extended swim platform, providing endless options for fun on the water.

ACALI is not just about luxury; she's also incredibly advanced. Her construction was overseen by a highly qualified and renowned superyacht industry surveyor and her hybrid propulsion system, paired with 170 square meters of solar panels, allows for eco-friendly cruising. She can even run in full-electric mode, offering silent, vibration-free navigation. Thanks to her smart battery management system, any excess solar power is stored to recharge her battery pack for future use, ensuring you can enjoy quiet time at anchor while still maintaining all the comforts onboard.

Key features

Exceptional interior volume with a 12m beam

Drop-down balconies in the VIP cabins

67 square metres of beach club

Hybrid propulsion system

170 square metres of solar panels

Smart battery management which stores solar energy for later use
