OVERVIEW.

Some yachts are designed to follow trends. ENERGY, the 77.8m (255.2ft) full-custom Amels delivered in 2022, was built to set them. With a steel hull and aluminium superstructure built to Lloyd's classification, styling by Espen Øino, and interiors by François Zuretti, ENERGY is the product of a design brief that challenged convention and placed the connection with the ocean at its core. The result is a motor yacht which redefines the modern yachting experience.

Her top deck is a masterclass in multi-use design. The forward helipad doubles as a sun lounge, open-air yoga studio, or private entertainment terrace with wraparound views, statement bar, and inside dayhead. Aft, a jacuzzi and sunpads create a private sanctuary. On the bridge deck, a purpose-built music lounge with Steinway baby grand piano and marble-topped bar delivers perfect acoustics, flowing aft to an al fresco lounge. Walkaround side decks give everyone on board the chance to enjoy the anchorage from multiple perspectives.

The owner's deck is among the most spectacular ever conceived. The forward suite has full-height glass and direct access to a private terrace with lounge, jacuzzi, and a dramatic marble firepit surrounded by armchairs and chaises longues. A private bar and lounge open on three sides to the sea, leading aft to dining for 18 guests and one of the largest swimming pools afloat.

Two forward VIP suites on the main deck enjoy sliding glass walls and private balconies. Elsewhere on this level you'll find a formal dining room, boardroom-style office, martial arts studio, intimate waterfall lounge, tender and toy decks, and a spectacular glass-elevator lobby.

Her lower deck is dedicated to wellness. Arrive through the beach club lobby and beauty salon, then flow into a spa with hammam, sauna, gym, and massage rooms. Huge sea terraces extend the space over the water, giving you and your guests uninterrupted ocean views. Four further guest suites complete accommodation for 14 guests across seven cabins.

Twin 3,046hp MTU diesel engines give her a top speed of 17 knots, and cruising speed of 13.5 knots and an easy transatlantic range of 5,000nm at economical speed. Two sets of stabilisers ensure comfort on arrival.

Launched in 2022, ENERGY offers a rare chance to acquire a recent full-custom Northern European pedigree yacht of the highest specification, designed for ocean connection and modern luxury living. Enquire today for full specifications, pricing, and to arrange a private inspection of ENERGY.

Key features
