THREE ACES

OVERVIEW.

The 16.8 meter (55.1ft) MKII Talaria remains Hinckley's flagship model in their impressive power yacht line up. Hinckley has pioneered and perfected their carbon/Kevlar resin infused hull and composite parts by use of Scrimp technology for over a decade. With use of these processes, the 55' Talria MKII hull and superstructure's strength and light weight are second to none in her class when compared to other composite vessel competitors.

THREE ACES, a flybridge model, is one of six built and features a custom hardtop with four Bowmar skylight hatches. She is currently with her third owner since new and has been continually maintained and upgraded. With a recent Flag Blue hull paint job by Hinckley in 2021 through spring of 2023, she has undergone a major refit and overhauls of her primary machinery.

THREE ACES' upgrades and low hours make her the most attractive flybridge model available on the market today. Her recent refit included, but was not limited to, MAN engines removed and overhauled, TwinDisc gearboxes removed and overhauled, new chilled water air conditioning plant, new refrigeration system, hull bottom media blasted and coated, and much more. During this period all navigational electronics were replaced, she received new soft goods throughout the interior and flybridge, and a custom-built hydraulic Freedom Lift system was added. This vessel represents a unique opportunity to own a highly modernized and upgraded flybridge model. THREE ACES cruises at 28 knots with a top speed of 36 knots in complete comfort.

Key features

Built in 2007 with a major refit completed in 2023

Interior configured to host four guests in two cabins

Top speed of 36 knots with a cruising speed of 28 knots

Engine/gearbox overhaul completed in Dec 2022

Tenders

3.6m (12ft) 40hp Walker Bay RIB tender
